MT. ST. HELENS
SOLID FUEL CHARBROILER
36 SERIES

Shown with optional shelf, pan rail and utensil holder.

Job Name	
Model	WS-SFB
Item#	

The 36" deep Mt. St. Helens Charbroiler features a "heat-sink" style firebox cast from our dense, durable high-temperature ceramic. The firebox is designed to store and radiate heat evenly. The grill utilizes sliding cast iron grates (6" x 24") which rest on our unique warp-resistant, stainless steel frame system. The entire grill frame slides toward the front or back of the unit to facilitate easy fire access. A blazing fire along the rear of the firebox will produce coals, which when pulled forward, will keep the entire firebox saturated with heat. An experienced solid fuel grill operator will be impressed by the even heat delivery and fuel-saving design of the Mt. St. Helens. The insulated firebox is mounted on top of a stainless steel wood storage cabinet. A countertop version is also available. The charbroiler comes standard on 4 heavy-duty, swiveling casters (2 with locking brakes). An ash shovel and coal/grate tool are included with the charbroiler.

The unit arrives completely assembled, ETL Listed, ready to install, and is made in the USA. Information about tools and accessories can be found online at: woodstone-corp.com.

FEATURES

- Durable Ceramic Firebox Construction
- Reduced Fuel Consumption
- Countertop Option
- Solid Fuel
- Wide Range of Sizes - 34", 45", 57", 72"
- Rotisserie Available on Select Sizes
- Rear-mount Heat Shield Available
- Optional Shelves and Pan Rails Available
